

Daniel Dzurevych

647-823-5759 | dldzurev@uwaterloo.ca | [linkedin](#) | danieldzurevych.com | [github](#)

TECHNICAL SKILLS

Programming Languages: Python, C, C++, C#, VHDL, JavaScript/Typescript, RISC-V, SQL, HTML, CSS

Technologies/Tools: Git, Linux, FastAPI, .NET, Flask, Docker, Vertex AI, BigQuery, GCP(Google cloud), Pandas, Numpy, Requests, Scikit Learn, Databricks, CMake, Distributed systems, Systems Programming, Networks, Bash

EDUCATION

University of Waterloo

2023-2028

Computer Engineering - Scholarships: \$7,500

Waterloo, ON

Courses: Data Structures & Algorithms, Object Oriented Programming, Digital Circuits/Systems

PROFESSIONAL EXPERIENCE

Software Engineer

May 2025 - August 2025

SIEMENS

Toronto, ON

- Developed and **tested** features for a proprietary networking **OS** used in switches/routers **worldwide**, including a universal embedded logging system that improved **observability** for validation and diagnostics (**C++/C, Bash**)
- Built efficient **SQL** queries for **relational databases**, .NET-based apps to improve manufacturing line efficiency and performed hardware validation
- Implemented and **debugged C/C++** modules for Ruggedcom industrial routers/switches on **Linux** in a **distributed system**, ensuring no new slow downs and **zero packet loss** under stress tests
- Collaborated with firmware engineers to design **diagnostics** workflows and used network protocols such as TFTP for device configuration and firmware transfer

AI Software Developer

September 2024 - December 2024

QUESTRADE ENTERPRISE

Toronto, ON

- Built an **LLM-OPS** and **prompt evaluation** platform (**Python, Scikit-learn, Pandas, Vertex AI, LangGraph**) to **validate** model outputs and catch failure modes early
- Created a automated **data cleaning** tool used for **600+** people (**JavaScript**) and modeled company-wide statistics (**Jupyter Notebooks**) to produce evidence-based reports for leadership
- Improved internal chatbot retrieval by enhancing **vector search** components (**Python, C++**), leading to more accurate responses for employees
- Designed, built and maintained **AI guardrails** with CI/CD and **automated testing** to enforce compliance for an **AI-driven financial product** and block unauthorized financial advice (**Python, Numpy**)
- Raised call-transcription accuracy by **15%** via a pipeline using **BigQuery (GCP)** and robust parsing/validation, enabling reliable analytics while protecting sensitive data

Coding Teacher/Developer

January 2023 - June 2023

TCDSB (Toronto Catholic District School Board)

Virtual across Toronto

- Founded** coding initiative for high-school students; delivered 9 workshops to **150+** attendees (HTML/CSS, JS, Python) where I learned to **communicate complex ideas clearly to any audience**

PROJECTS AND AWARDS

- Shipped Orchestrator (Hack the North) in **36hrs**, a **full-stack**, polished UI, nocode trading & **back testing** platform with server-side SMA/EMA/Bollinger that lets users visually design, validate, and auto-execute HFT/quant-style strategies, bridging the gap between retail and institutional traders (**Python/FastAPI, JavaScript, FinnHub**)
- Built "Conductor," a **RAG AI orchestration** platform that automates end-to-end workflows across Slack, Gmail, Notion, and **AI voice agents** using **Python (FastAPI, Flask)**, and Various API's
- Created a **C++ Time-Series data analysis** tool that parses a csv's rows, builds a graph, and uses hashing for **O(1)** lookup and offers various tools to summarize data (successfully tested for up to **2 million data points**)
- Built a text-to-Morse communication device with LED output on a **RISC-V microprocessor**, showcasing low-level I/O signaling and **embedded systems** programming with deterministic timing
- Won **\$10,000 hackathon**: using **Python** and JavaScript my team and I built a chrome extension connected to **Vertex AI** that learns from users interacting with new tools/software and creates company templated and personalized tutorials (based on FIGMA designs) for mentioned tools
- Other**: Power Lift, Piano, Speak Ukrainian, Ski, Marathon Runner, Crypto/Equity Trader
